COMPLIANCE

**STORE A COPY OF ALL EMAIL MESSAGES ENTERING, LEAVING AND CIRCULATING WITHIN YOUR ORGANISATION WITH THE EMAIL VAULT FROM PREEMPTIVE SOFTWARE.**

#### SOLUTION

**The Preemptive Email Vault is an Australian solution built to suit the stringent requirements of Government and Private Enterprise organisations.**

The Vault is a centralised system that stores a copy of all email entering, leaving and circulating within your organisation. Messages are automatically captured – there are no special steps required for your email users.

By analysing, deconstructing and efficiently storing your email in the Vault, you will reduce your email storage requirements by up to 80%. Messages are stored in a format-neutral way with SQL and XML, meaning that you are not locked into any proprietary architecture for your email storage. An all too common problem today.

The Preemptive Email Vault's administration client gives complete visibility over activity in your email system. For the first time you will be able to find out who sends what and when, allowing you to effectively manage this crucial business resource. The administration client provides wide ranging reporting and data access across the message store.

With the Personal Browser component of the Vault, staff can retrieve their email unassisted. At the click of a button they can instantly restore a message back into their mail file.

By storing message metadata in a relational database, the system provides a highly scalable and high performance storage backend and makes native SQL queries possible.

The Vault significantly reduces search and compliance costs, removes the requirement for mail quota's and offers massive storage savings.

Architected with active active DR capability, customers can seamlessly run cloud and on premise instances.

Exchange, Notes or SMTP  
email management  
Cloud email DR  
email backup  
Legal Discovery

The Vault seamlessly supports Domino and Exchange simultaneously, which is ideal for organisations migrating between mail platforms.

#### Have complete visibility of your entire email system

Management access to the Preemptive Email Vault is via the Vault Auditor. This tool gives email administrators and auditors complete visibility over your email system.

With the Vault Auditor you can:

- Find and track attachments in seconds
- Recover messages instantly
- Identify top email authors and recipients within your organisation so you can target your training effectively and efficiently

#### REPUTATION

**Preemptive Consulting is an Australian based developer that specialises in providing secure and innovative email management solutions.**

The company's unique services and products help organisations to regain control of their email environment, while reducing their total cost of ownership.

Preemptive Consulting is an Australian Government Endorsed Supplier.
